How to Use This Book!

All you need is a pencil, eraser,
and a piece of paper!

Follow each drawing diagram step by step:

Tips:

Draw lightly at first, because you might need to erase some lines as you work.

Add details according to the diagrams, but don't worry about being perfect! Artists frequently make mistakes - they just find ways to make their mistakes look interesting.

Don't worry if your drawings don't turn out the way you want them to. Just keep practicing! Sometimes drawing the same thing just a few times will help.

Once you've finished your drawing in pencil you can trace it with a black fineliner pen and color or paint it to your liking.

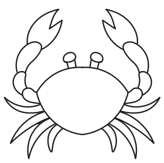

You can draw a new item or character every day for 365 days - or use your creativity to combine multiple drawings into an entire scene.

Turn the page for some cool composition ideas!

ADD PERSPECTIVE TO YOUR DRAWINGS BY USING THE VANISHING POINT AND A PERSPECTIVE GRID!

The “vanishing point” is a point on the horizon in which a set of parallel lines appear to converge into a single point. For example, railroad tracks appear to converge in the distance in this photograph:

To use a perspective grid, lightly draw guide lines with a pencil as shown below with a ruler. Then use the grid as a guide for how to angle your lines accurately to convey perspective as shown in the bottom demonstration.

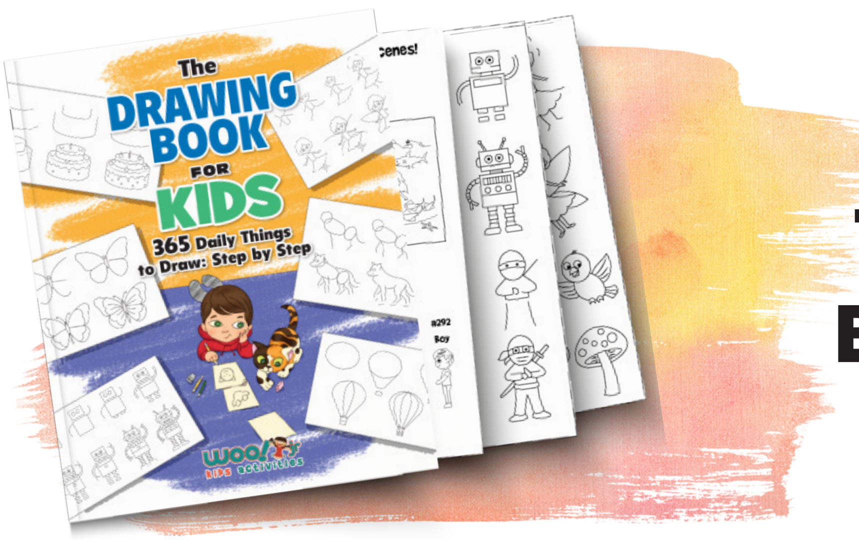

To learn more about making your drawings look 3 dimensional with perspective, read our free tutorial at:
